The **GEOMETRICA II** COLLECTION of Hardwood Floor Border Inlays

The Geometric Border Inlays.

The 2011 2nd GEOMETRIC COLLECTION offers a number of 49 inlay border patterns that can be, as in the case of the 1st collection, independently installed with parquetry laid in different layouts: Herringbone, Basket, Chevrons, English, etc.

In building this catalog, our aim was to offer, for each individual pattern, a number

of wood specie combinations so the customer can have a good idea on how a potential pattern to be ordered could look like.

The standard thickness is 10 mm but we can offer the borders at other thicknesses if requested.

Craftsmanship.

Every product we manufacture, is created with the aim of enhancing the wood floor it ends up in. In aesthetic and in value. To achieve this goal, the wood components, part of each border or medallion, travel through a number of processing stages, where they are carefully transformed to fit the final installation.

Once ready, each piece of wood takes its place in the larger assembly a border or a medallion is composed of. All this being hand done by an artisan.

Made-to-order.

All of the decorative parquetry produced by us is made-to-order.

Nothing is available "on stock".

Purchasing a product this type which complements a house's parquetry and last for 100 years deserves waiting additional days for manufacturing.

The manufacturing time depends on the complexity of the pattern and of course the size of the order.
